Bio

Hi! I'm Ilya, a dedicated full-stack developer with over 3 years of experience in building web applications and server-side solutions. My journey in programming began at the age of 12, and since then, I've been continuously refining my skills. Clients appreciate my attention to detail and commitment to delivering well-crafted, polished products.

In addition to my professional experience, I have made several small contributions to open-source projects.

I pride myself on being a collaborative team player and an effective communicator. I value teamwork and am always open to constructive feedback, actively engaging with clients and stakeholders to ensure optimal outcomes.
